INNOVICA

Artistry that engulfs décors in *elegance*

With a consistent and all-pervasive streak to excel and bring about exclusive creations for our customers, Innovica reigns in the areas of creative flair and shows its realm of exquisite charm par excellence with its range that's alluring and awe-inspiring.

About the Collection

This range of Innovica decorative laminates is available in 1.00 mm thickness and 1220x2440 mm size. These surfaces have been manufactured using 100% imported decor paper and plates, Virgin Kraft paper and 100% pure resin. The use of high-quality raw materials and advanced manufacturing techniques make Innovica 1.00 mm sheets highly non-abrasive and they weigh only 4400 gms.

Grade: General & fire retardant [FR]

Types: Compact, backer, standard, cabinet liners

Innovica Highlight: With cutting edge designs and most standard high end raw materials, utmost flexibility and durability, complete surface protection with PP film, Innovica's efficiency is unsurpassable.

Care & Maintenance: It needs meticulous care and precision in the cleaning and maintenance area, which is basic, yet crucial. Only soft moist cloth is a safe option with warm soap solution for cleaning the surface. Use of detergents or excess soda can have detrimental effects.

Disclaimer: Please double check your order of the select laminate. Once done, we do not claim any responsibility of errors whatsoever. Samples are for color, pattern and surface finish reference, not the actual thickness. Any specific enquiries regarding finishes or applications would be done on request.

Warranty: Innovica warrants that its products do not have manufacturing hazards. But this has severe restrictions with regard to use, the source buying option, or improper use / carelessness. We recommend proper inspection of the product and we do not hold any liability for hazards caused due to any negligence or causal effects of unexpected impact or origin.

Cutting a laminate sheet at an angle of 90 degree leads to development of cracks in corner after pasting. Therefore it is advisable to avoid cutting at an angle of 90 degrees.

The company will have no liability if bubbles form on the surface due to the below mentioned reasons:</
